Graduated with an Advanced Diploma.

Experience

Alarm.com
Software Engineering Intern, June 2016 — August 2016
Built an API in C# to update branding information on home security panels faster and more reliably by automating a previously manual process.
Implemented a caching system for account information to speed up the dealer site page load speed by 40-60%.
Developed a tool to allow home owners to verify local retailer information.

Sure Secure Solutions
Software Engineering Intern, August 2014 — August 2015
Worked in a team on a government contract to develop a secure and multi-functional internal NASA web portal.
Developed and managed the official company website using JavaScript where appropriate to make webpages robust and responsive.
Managed server through Amazon Web Services.

Alesig Consulting
Intern, May 2014 — August 2014
Aided in the development and testing of the Detroit Department of Transportation mobile application.
Managed research database and wrote in-depth reports about the mobile application.
